

REQUEST TO DISCONTINUE WATER and SEWER SERVICE

Tracking No. _____

(To be used in conjunction with City Demolition Application available from Permits/CED Department)

I (Property Owner's Printed Name) _____ hereby request, in accordance with City of Mountlake Terrace Municipal Code (MTMC) 13.05.120 and 13.05.230, that bi-monthly water and sewer service fees not be applied to my account for the property located at _____ following removal of the existing water meter and capping of the service line. Bi-monthly charges will be discontinued once City staff have verified that my water meter has been removed and my water service line has been capped. Bi-monthly charges will re-commence when water service has been re-established to the property.

- I understand I am responsible for costs related to the Demolition Permit, meter removal, and capping of the service line, in addition to other applicable charges.
- I understand that this request may in fact cause me to incur greater costs (see below) than had base water and sewer charges continued to be billed, bi-monthly, for the duration of the suspended service charges, and subsequent costs of reinstalling a water meter, and have been informed of this fact.
- Stormwater charges will continue to be billed to the account.

COSTS: Costs include, but are not limited to:

- *The current permit fees for a Demolition Permit (Apply at CED Department, City Hall).*
- *The cost for a private contractor to remove the meter and cap the service line.*
- *Charges for City staff to inspect/verify removal of the meter and capped service line (Hourly rate).*
- *Charges for the Utility Billing Coordinator to discontinue bi-monthly billing and reestablish billing once the meter has been re-installed.*
- *The cost for a private contractor to reinstall the meter and reestablish the service line.*
- *Charges for City staff to inspect re-installation of the meter and service line.*
